Dr. Rebecca Haeusler  
*Assistant Professor, Columbia University*

**Intersection of hepatic insulin signaling with cholesterol and bile acid metabolism**

ERIBA seminar room, 3th floor  
Time: 12-13 hrs

Short bio:

Rebecca Haeusler's research is centered on lipid and bile acid metabolism, and how abnormalities in these pathways contribute to cardiometabolic disease. She carried out postdoctoral research in the department of Medicine at Columbia University, and in 2014 she was recruited by the department of Pathology and Cell Biology at Columbia to start her independent laboratory as a tenure track Assistant Professor. Dr. Haeusler has been funded by major NIH grants including a K99/R00 followed by two R01s, and she has won awards for her research including the David L. Williams Award for research on lipids and lipoproteins and the Journal of Clinical Investigation lectureship Award.
